

Rohan Satishchandra Wani

+91 7020939820 | wanirohan21@gmail.com | linkedin.com/in/rohan-wani | github.com/wani21

Third-year Computer Engineering student with hands-on experience in Java, Python, Spring Boot, AI/ML, and full-stack development. Skilled in building scalable applications, REST APIs, and database-driven systems. Proficient with Git, Docker, AWS, and SDLC practices. Passionate about building AI-enabled software and improving system performance.

EDUCATION

MIT Academy of Engineering

Bachelor of Technology in Computer Engineering | CGPA: 7.98

Pune, India
2023 – 2027

- Courses: Data Structures & Algorithms, Object-Oriented Programming, Database Systems, Operating Systems, Computer Networks

TECHNICAL SKILLS

Languages	Java (Core & Advanced), Python, C++, JavaScript, SQL
AI / ML	TensorFlow, Scikit-learn, OpenCV, NumPy, Pandas
Backend & APIs	Spring Boot, Spring MVC, Spring Security, Hibernate, REST APIs, JWT, Microservices
Frontend	React.js, HTML5, CSS3, JavaScript, Tailwind CSS
Databases	MySQL, PostgreSQL, MongoDB, Schema Design, Query Optimization
Tools & Cloud	Git, GitHub, Docker, Linux, AWS (EC2, S3), Postman, CI/CD
CS Fundamentals	OOP, DSA, DBMS, OS, Computer Networks, SDLC, API Testing, Debugging

EXPERIENCE

Software Development Intern

YBI Foundation

Jun 2023 – Aug 2023
Remote

- Developed ML applications using Python and Scikit-learn, implementing end-to-end pipelines for data preprocessing, feature engineering, model training, and evaluation.
- Tested and validated model performance using evaluation metrics; documented results and contributed to improving solution accuracy and reliability using Git for version control.

PROJECTS

SamaySetu – Academic Timetable Management System / Java, Spring Boot, JWT, [Repository](#) [Live Demo](#) MySQL, JPA/Hibernate, React (TypeScript), Tailwind CSS

- Developed a full-stack timetable management system using Spring Boot, React (TypeScript), MySQL, and JWT authentication, following a layered Controller–Service–Repository architecture and SDLC best practices.
- Designed REST APIs, role-based access control, and optimized relational database schemas using JPA/Hibernate for secure, scalable data management.
- Built conflict detection and resource allocation modules for teachers, classrooms, and batches with business validation logic to eliminate scheduling conflicts.
- Performed API testing using Postman, debugging, and issue resolution; managed source code via Git with feature-based version control workflows.

GastroLens-AI – AI-Powered Gastrointestinal Disease Detection / Python, TensorFlow, OpenCV, NumPy, [Repository](#) Pandas, FastAPI

- Developed an AI-powered image classification system using TensorFlow and OpenCV to detect and classify gastrointestinal abnormalities from endoscopic images.
- Built an end-to-end preprocessing pipeline (noise reduction, normalization, contrast enhancement, data augmentation) and optimized models using Accuracy, Precision, Recall, and F1-Score metrics.
- Designed a modular architecture for future FastAPI integration, enabling scalable deployment and real-time inference.

Digital Core Banking System / Java, Spring Boot, Microservices, MySQL, Spring Security, Docker, React.js [Repository](#)

- Built a core banking platform supporting customer onboarding, multi-account management, fund transfers, and fixed deposit booking with automated interest calculation.
- Designed separate services for accounts, transactions, and deposits; ensured reliable transaction handling with rollback support and a complete audit log for all operations.
- Secured all APIs using Spring Security with JWT-based authentication and role-based access; containerized with Docker for easy deployment and automated monthly account statements.

ACHIEVEMENTS

- 2025 | SIH Finalist** — Smart India Hackathon; advanced to national finals among thousands of competing teams across India.
- 2023–2027 | Super 30 Member** — Selected in MIT AOE's elite Super 30 program recognizing the institution's top-performing students.
- MTSE Scholar** — Maharashtra Talent Search Examination merit scholarship recipient.
- Campus Ambassador, GeeksforGeeks** — Promoted DSA and competitive programming on campus; drove measurable student participation in workshops and coding contests.
